Attorney's Docket No.: 13292-008001  
Client Ref. No.: P2002,1043USE

AMENDMENTS TO THE CLAIMS:

This listing of claims replaces all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. ~~A method of generating an executable file, the method comprising:~~

generating an executable file, wherein generating an executable file comprises:

subdividing a target name into portions at one or more predetermined points,

wherein subdividing the target name comprises:

identifying at least one of the predetermined points by detecting a first

character sequence, the first character sequence separating compiler conditions,

wherein detecting the first character sequence comprises detecting an underscore;

identifying at least one of the predetermined points by detecting a second

character sequence, the second character sequence separating run-set components,

wherein detecting the second character sequence comprises detecting a period,

saving at least one of the portions ~~portion~~ as a list variable; and

adding a compiler specific prefix to the list variable.

2-5. (Canceled)

2

6. (Original) The method of claim 1, wherein saving at least one portion comprises

using the list variable as a run-set component.

<sup>3</sup>  
~~7~~. (Original) The method of claim 1, wherein saving at least one portion comprises using the list variable as a manufacturing-set component.

<sup>4</sup>  
~~8~~. (Original) The method of claim 1, wherein saving at least one portion comprises using the list variable as a compiler condition.

<sup>5</sup>  
~~9~~. (Original) The method of claim 1, further comprising determining that the target name can be further subdivided at one or more delimiters.

<sup>6</sup>  
~~10~~. (Currently Amended) The method of claim ~~[[8]]~~ 1, further comprising using the list variable as a dependency.

<sup>7</sup>  
~~11~~. (Currently Amended) The method of claim ~~[[8]]~~ 1, further comprising using the list variable as a declared object.

12. (Canceled)

<sup>8</sup>  
~~13~~. (Currently Amended) An apparatus comprising:  
a memory that stores executable instructions for generating software code using a computer language; and

a processor that executes the instructions to:

subdivide a target name into subparts at one or more predetermined points;

wherein subdividing the target name comprises:

identifying at least one of the predetermined points by detecting a first  
character sequence, the first character sequence separating compiler conditions,  
wherein detecting the first character sequence comprises detecting an underscore;

identifying at least one of the predetermined points by detecting a second  
character sequence, the second character sequence separating run-set components,  
wherein detecting the second character sequence comprises detecting a period,

save at least one of the subparts ~~subpart~~ as a list variable; and [[.]]

add a compiler specific prefix to the list variable.

14-17. (Canceled)

<sup>9</sup>  
18. (Original) The apparatus of claim <sup>8</sup>13, wherein to save at least one portion comprises  
to use the list variable as a run-set component.

<sup>10</sup>  
19. (Original) The apparatus of claim <sup>8</sup>13, wherein to save at least one portion comprises  
using the list variable as a manufacturing-set component.

<sup>11</sup>  
~~20~~. (Original) The apparatus of claim <sup>8</sup>~~13~~, wherein to save at least one portion comprises using the list variable as a compiler condition.

<sup>12</sup>  
~~21~~. (Currently Amended) The apparatus of claim <sup>8</sup>~~13~~, wherein the processor executes instructions further comprising to determine that the target name can be further subdivided at one or more delimiters.

<sup>13</sup>  
~~22~~. (Currently Amended) The apparatus of claim <sup>11</sup>~~20~~, wherein the processor executes instructions further comprising to use the list variable as a dependency.

<sup>14</sup>  
~~23~~. (Currently Amended) The apparatus of claim <sup>11</sup>~~20~~, wherein the processor executes instructions further comprising to use the list variable as a declared object.

24. (Canceled)

<sup>15</sup>  
~~25~~. (Currently Amended) An article comprising a machine-readable medium that stores executable instructions for generating an executable file, the instructions causing a machine to:  
subdivide a target name into subparts at one or more predetermined points; wherein the instructions to subdivide the target name comprise instructions to:

identify at least one of the predetermined points by detecting a first  
character sequence, the first character sequence separating compiler conditions,  
wherein detecting the first character sequence comprises detecting an underscore;  
identify at least one of the predetermined points by detecting a second  
character sequence, the second character sequence separating run-set components,  
wherein detecting the second character sequence comprises detecting a period;  
save at least one of the subparts ~~subpart~~ as a list variable; and [[.]]  
add a compiler specific prefix to the list variable.

26-29. (Canceled)

<sup>16</sup>  
~~30~~. (Original) The article of claim <sup>15</sup>~~25~~, wherein the instructions causing the machine to  
save at least one portion comprise instructions causing the machine to use the list variable as a  
run-set component.

<sup>17</sup>  
~~31~~. (Original) The article of claim <sup>15</sup>~~25~~, wherein the instructions causing the machine to  
save at least one portion comprise instructions causing the machine to use the list variable as a  
manufacturing-set component.

<sup>18</sup>  
~~32~~. (Original) The article of claim <sup>15</sup>~~25~~, wherein the instructions causing the machine to save at least one portion comprise instructions causing the machine to use the list variable as a compiler condition.

<sup>19</sup>  
~~33~~. (Original) The article of claim <sup>15</sup>~~25~~, further comprising instructions causing the machine to determine that the target name can be further subdivided at one or more delimiters.

<sup>20</sup>  
~~34~~. (Original) The article of claim <sup>18</sup>~~32~~, further comprising instructions causing the machine to use the list variable as a dependency.

<sup>21</sup>  
~~35~~. (Original) The article of claim <sup>18</sup>~~32~~, further comprising instructions causing the machine to use the list variable as a declared object.

36. (Canceled)
